

Notes on Maps of the Callovian and Tithonian Paleogeography of the Caribbean, Atlantic, and Tethyan Realms: Facies and Environments

Caroline Wilhem*

*Institute of Earth Sciences, Faculty of Geosciences and Environments, University of Lausanne,
Geopolis, 1015 Lausanne, Switzerland*

A. NOTE

The Callovian-Tithonian period of the Atlantic and its connected oceans was tectonically intense. It was mainly marked by the opening of the Caribbean Seaway, the pursuance of the Atlantic and Tethyan spreading, as well as the North Atlantic rifting. This period is characterized by a general deepening of the oceans. At the same time, the sedimentation passed from largely siliceous to carbonaceous deposits within the Tethyan realm.

Callovian and Tithonian facies and environments were compiled and added to a plate tectonics model that constrains their arrangements. The elaboration of paleo-environmental maps at large scale hides various regional paleogeographic interpretations and many controversies. With the help of the plate tectonics model, different possibilities emerge and regional interpretations are reconciled at a larger scale. This leads to an alternative paleogeographic model for the Callovian and Tithonian age. These maps show the evolution of sedimentary deposits with their evolving associated tectonic context and may be considered as a useful tool for helping scientists of various disciplines in their research.

The tectonic reconstructions for the Callovian and Tithonian used within the present work are derivative from the 600–0 Ma Neftex Geodynamic Earth Model (© Neftex Petroleum Consultants Ltd.), which is based on the integration of dynamic plate boundaries, plate buoyancy factor, ocean spreading rates, subduction rates, past synthetic isochrones and global geometric constraints as, well as pluridisciplinary field and laboratory geological data. The methodology of plate tectonic modeling was introduced by Stampfli and Borel (2002) and technically

detailed in Hochard (2008). The Mesozoic reconstructions were partly presented and discussed in Flores (2009) for the Pacific and Caribbean realms; in Stampfli and Borel (2002, 2004) for the Atlantic realm; and in Stampfli (2000, 2001), Stampfli et al. (2001a, 2001b, 2002, 2003), Stampfli and Borel (2004), Stampfli and Kozur (2006), Bagheri and Stampfli (2008), Bonev and Stampfli (2008, 2011), Moix et al. (2008), and Stampfli and Hochard (2009) for the Tethyan realm.

Key localities and linked references used for the elaboration of the Callovian and Tithonian maps are geographically presented in section B. The Dercourt et al. (1993, 2000) atlases were used as general references. The characteristics and development of the various Middle–Late Jurassic facies and environments of the Caribbean, Atlantic, and Tethyan realms are detailed in the latter works.

B. KEY LOCALITIES AND ASSOCIATED REFERENCES

1. The Pacific Realm (Pacific Plate)

BaCa—Baja California.
Salvador et al. (1992) and Flores (2009).

2. The Transitional Pacific-Atlantic Realm (Chortis, Yucatan, North, and South American Plates)

2.1. Mexico and Gulf of Mexico (United States)

Chortis: Cho—Chortis; Mix—Mixteca; Oax—Oaxaquia; Tahu—Tahue; Zapo—Zapoteco.

North America: Alda—Adama; Bis—Bisbee; Chi—Chi-huahua; Coa—Coahuila Basin; Cor—Cortes; GM—Gulf of Mexico; Hid—Hidalgo; Hui—Huizachal; LPop—La Popa

*caroline.wilhem@gmail.com

Basin; Monc—Monclova; Monte—Monterrey; NuRo—Nueva Rosita; PeBl—Penon Blanco; Pic—Picachos; PoRi—Poza Rica; Pue—Puebla; Sabi—Sabinas Basin; Salt—Saltillo; SiMa—Sierra Madre; SLP—San Luis Potosi; Sono—Sonora; TaMi—Tampica-Misant Basina; TanA—Tamaulipas Arch; Vera—Veracruz.

Yucatan: ChiB—Chiapas Basin; ChiM—Chiapas Massif; ChTa—Chiapas Tabasco; MaU—Maya Uplift; SoCa—Sonda de Campeche; Yuc—Yucatan.

Caballero-Miranda et al. (1990), Salvador et al. (1992), Marton and Buffler (1994), Barboza-Gudino et al. (1999), Franco-Rubio, (1999), Marton and Buffler (1999), Angeles-Aquino and Cantú-Chapa (2001), Cantú-Chapa (2001), de Antunano (2001), Dickinson and Lawton (2001), Goldhammer and Johnson (2001), Lawton et al. (2001), Meneses-Rocha (2001), Ortega-Gutiérrez et al. (2007), Centeno-García et al. (2008), and Galloway (2008).

2.2. Caribbean (Cuba, Bahamas)

Yucatan: Esc—Escambray; Gua—Guaniquanco; Pino—Pinos.

North America: BaP—Bahamas Plateau; CaGa—Cap Gap; CBP—Cuban Bahamas Platform; Exu—Exuma; Flor—Forida; PuAl—Punta Alegre.

Iturralde-Vinent (1994), Pszczołkowski (1999), and Iturralde-Vinent (2006).

2.3. Venezuela

South America: BarB—Barinos Basin; DemR—Demerara Rise; Espi—Espino; EVB—East Venezuela Basin; Guaj—Guajira; GuyB—Guyana Basin; LlaB—Llamos Basin; Meri—Merida; Peri—Perijia; Seln—Serrana del Interior; Tri—Trinidad.

Algar and Erikson (1995), Giunta et al. (2002), Ostos et al. (2005), and Pindell and Kennan (2009).

3. Atlantic Realm (Gondwanian, North American, Iberian, and Eurasian Plates)

Gondwana: AaTa—Aaiun-Tarfaya Basin; CanI—Canary Islands; CB—Cap Blanc; Essa—Essaouira; GuiT—Guinea Terrace; MazP—Mazagan Plateau; SenBm—Senegal Basin.

North America: BBB—Blake Bahamas Basin; BCT—Baltimore Canyon Trough; BP—Blake Plateau; CaHa—Cape Hatteras; CarT—Carolina Trough; GBB—Grand Bank Basin; GeBB—Georges Bank Basin; JAB—Jeanne d'Arc Basin; LabS—Labrador Shelf; Rock—Rockall; ScoB—Scotian Basin.

Iberia: GalB—Galicia Bank; FCB—Flemish Cap Basin; LusB—Lusitanian Basin

Eurasia: PoB—Porcupine Basin; Iri—Irish Basin.

Jansa et al. (1979), Jansa et al. (1982), Ranke et al. (1982), Baumgartner et al. (1983), Ogg et al. (1983), Robertson and Ogg (1986), Gohn (1988), Olsson et al. (1988), Poag and Valentine (1988), Ziegler (1988), Steiner et al. (1998), and Ford and Golonka (2003).

4. The Tethyan Realm (Gondwanian, Eurasian, Moesian, and Iberian Plates)

4.1. Gondwana

BarrB—Barreira Basin; ChaB—Chad Basin; FoAm—Foz do Amazonas Basin; GhB—Ghadames Basin; LulB—Lulmeden Basin; MurB—Murzuq Basin; OMB—Oued Mya Basin; PaMa—Para-Manranhao Basin; SirB—Sirte Basin; SLL—Sierra Leone-Liberia Basin; TadB—Taoudeni Basin; TimB—Timimoun Basin; UEgB—Upper Egypt Basin.

Dercourt et al. (1993, 2000) and IHS confidential data.

4.2. Gondwanian Margin

4.2.1. Morocco

Atla—Atlas; ConP—Constantine Platform; ExRi—External Rif; MagP—Maghrebian Platform; MAt—Middle Atlas; Mese—Meseta; TeT—Tellian Trough.

Wildi (1979, 1981, 1983), Hinz et al. (1982), Benzaggagh (2000), Benzaggagh and Habibi (2006), Chalouan et al. (2008), and Frizon de Lamotte et al. (2008).

4.2.2. Tunisia, Malta, and Sicilia

Malt—Malta; SPel—Sicilian Pelgian Basin; TPel—Tunisian Pelgian Basin; TuDo—Tunisian Dorsale; TunT—Tunisian Trough.

Soussi et al. (2000, 2003), Enay et al. (2005), and Boughdiri et al. (2006, 2007).

4.2.3. Lybia, Arabia, Eastern Turkey, and Iran (Zagros)

Bisi—Bisitoun; CyrP—Cyrenica Platform; Karad—Karadut; Kerm—Kermanshah; Hawa—Hawasina; Haz—Hazro; Hez—Hezan; Mar—Mardin; Hez—Hezan; arB—Marmarica Basin; Mist—Mistah; Ney—Neyriz; Pich—Pichakun.

Bechennec et al. (1990), Fourcade et al. (1991), Barrier and Vrielynck (2007), and Gharib and De Wever (2010).

4.3. Apulia, Adria, Anatolia, Pelagonia and Pindos, Maliac, Vardar, and Tethyan (Ligurian, Lombardian) Domains

4.3.1. Italy (Sicilia, Apennines, and Southern Alps)

Adri—Adria; Apu—Apulia; Bel—Belluno; CaLu—Campania-Lucana; Cana—Canavese; Emma—Emma Basin; ExLi—External Ligurian; Fri—Friuli; GSR—Gran Sasso Range; InLi—Internal Ligurian; LaAb—Latium-Abbruzzi; LaNe—Lago Negro; Lomb—Lombardian; Pano—Panormides; Pol—Pollino; SicB—Sicanian Basin; Tren—Trento Plateau; TusB—Tuscan Basin; UmMa—Umbria Marche; Verb—Verbicaro.

4.5. Moesia and Vardar Domain (Romania, Bulgaria, Macedonia, and Northeastern Greece)

Ani—Anina; Bar—Barlya; Belo—Belogradchik; Danu—Danubian; Ele—Elena; ESRe—East Srednogorie; Gab—Gabrovo; Get—Getic; Gint—Gintsi; Iz—Izdemets; Kot—Kotel; Mac—Macin; Ni—Nish; Pai—Paikon; Peo—Peonias; Ray—Rayantsi; Rhodo—Rhodope; SApu—South Apuseni; SDob—South Dobrogea; Sev—Severin; SM—Serbo-Macedonian; SuGe—Supra-Getic; Trek—Trelyano; TrSy—Transylvanides; Tul—Tulcea; Yun—Yunak; Zvez—Zvezdets.

Sândulescu (1975), Tchoumatchenko et al. (1992), Tchoumatchenco and Sapunov (1994), Ferrière and Stais (1995), Sapunov (1999), Georgiev et al. (2001), Seghedi (2001), Csontos and Vörös (2004), Lazar et al. (2004), Tchoumatchenco (2006), Lakova et al. (2007), and Sapunov and Metodiev (2007).

4.6. Eurasia

Armo—Armorica; Bohe—Bohemian Massif; Cado—Cadmia; EEPM—East European Platform Margin; Karp—Karpinsky; LBM—London Brabant Massif; Rhen—Rhenish Massif; STaM—Stavropol Massif.

Dercourt et al. (1993, 2000) and Daukeev et al. (2002).

4.7. Eurasian Margin (Carpathians to Provence)

4.7.1. Eastern (Dacides) and Western Carpathians (*Pieniny Klippen Belt*)

Buco—Bucovinian; Cea—Ceahlau; Czor—Czorztyn; Magu—Magura; Pien—Pieniny; PoBo—Poiana Botizii; Sile—Silesian; SuBu—Subbucovinian.

Sândulescu (1975), Mišík (1994), Krobicki et al. (2003), Aubrecht and Sýkora (2004), Oszczypko et al. (2004), Lewandowski et al. (2005), Sidorkuk (2005), Aubrecht et al. (2006), Oszczypko (2006), Froitzheim et al. (2008), Pienkowski et al. (2008), and Schlögl et al. (2009).

4.7.2. Western Alps, France, and Corsica

Ann—Annecy; Bala—Balagne Nappe; Bre—Breche Nappe; Brian—Briançonnais; Cau—Causses; Co—Corsica; Dau—Dauphinois; Dij—Dijon; Fran—Francardo; Gen—Genève; Gren—Grenoble; He—Helvetic; Jura—Jura; Lion—Golfe du Lion; Lyon—Lyon; Mars—Marseille; MC—Massif Central; Mont—Montpelier; Nice—Nice; Nies—Niesen Nappe; NHel—North Helvetic; PuCa—Punta di Calcina; Sept—Plate-forme Septentrionale; SubA—Subalpine Basin; SubB—Subbrianconnais; Toul—Toulon; UH—Ultrahelvetic.

Gwinner (1978), Trümpy (1981), Debrand-Passard et al. (1984), Tollmann (1985), Stampfli et al. (1998), Peybernes et al. (2001), Stampfli (2001), Stampfli et al. (2002), Marroni and Pandolfi (2007), Stampfli and Hochard (2009), and Graciansky et al. (2011).

4.8. Iberia

4.8.1. Italy (*Calabria, Sardinia*)

Cala—Calabria; Calo—Caloveto; MoSo—Monte Soro; Posa—Posada; SuMo—Supramonte; Tac—Tacchi.

Dercourt et al. (1993, 2000), Santantonio (1993), and Costa-magna et al. (2007).

4.8.2. Spain (*Betic and Balearic Islands*) and Morocco (*Internal Rif*)

Cab—Cabrera; ExSu—External Subbetic; IBet—Internal Betic; IbMe—Iberian Meseta; InRi—Internal Rif; InSu—Internal Subbetic; ISu, Intermediate Subbetic; Kaby—Kabylie; Mall—Mallorca; MeSu—Median Subbetic; PBet—Prebetic; SBe—Subbetic.

Wildi (1979), Molina et al. (1999), O'Dogherty et al. (2001), Vera (2001), Aurell et al. (2002), Caracuel et al. (2006), Gómez and Fernández-López (2006), Chalouan et al. (2008), and Aurell et al. (2010).

5. The Eastern Tethyan Realm (Eurasian, Sakarya, and Iranian Plates)

5.1. Turkey (*Pontides*) and Caucasus

Baku—Baku; Dzir—Dzirula; EKub—East Kuban; Epo—Eastern Pontides; GCau—Great Caucasus; Ist—Istanbul; IzAn—Izmir Ankara; Kara—Karakaya; Kark—Karkinitsky; Kure—Küre; Saka—Sakarya; SCrim—South Crimea; Terek—Terek; TrCa—Transcaucasus; WKub—West Kuban; Zong—Zonguldak.

Nikishin et al. (1998), Kozur et al. (2000), Nikishin et al. (2001), Daukeev et al. (2002), Barrier and Vrielynck (2007), and Moix et al. (2008).

5.2. Iran (*Sanandaj, Lut-Tabas, and South Caspian*)

Chalu—Chalus; EAlb—Eastern Alborz; Lut—Lut; Rasht—Rasht; Ravar—Ravar; San—Sanandaj; SCasp—South Caspian; Sir—Sirjan; Tab—Tabriz; Tal—Talesh; Teh—Tehran; Yazd—Yazd.

Stampfli (1978), Berberian and King (1981), Davoudzadeh and Schmidt (1984), Dercourt et al. (1993), Dercourt et al. (2000), Barrier and Vrielynck (2007), and Wilmsen et al. (2009).

ACKNOWLEDGMENTS

I am grateful to the University of Lausanne for funding this research and I express my gratitude to Professor Peter O. Baumgartner for initiating this project. I am also very grateful to Professor Ron Blakey for his belief that these maps should be published and for his pertinent comments.

I am particularly grateful to the following persons for their rewarding discussions and insight into regional geology: Eric Champod and Jacky Ferrière for the geology of Greece, Patrice Moix for the geology of Turkey, Federico Galster for the geology of the Alps, Gérard Stampfli for general Tethyan geology, and Peter O. Baumgartner for the geology of the Caribbean, Greece, and some other Tethyan regions.

The plate tectonic reconstructions presented here were carried out as part of the research program of the University of Lausanne on the Stampfli geodynamic model, which is now owned by Neftex Petroleum Consultants Ltd. and attached to the “Neftex Geodynamic Earth Model.” I am grateful to Neftex for allowing us to present some details from the geodynamic model in this publication.
